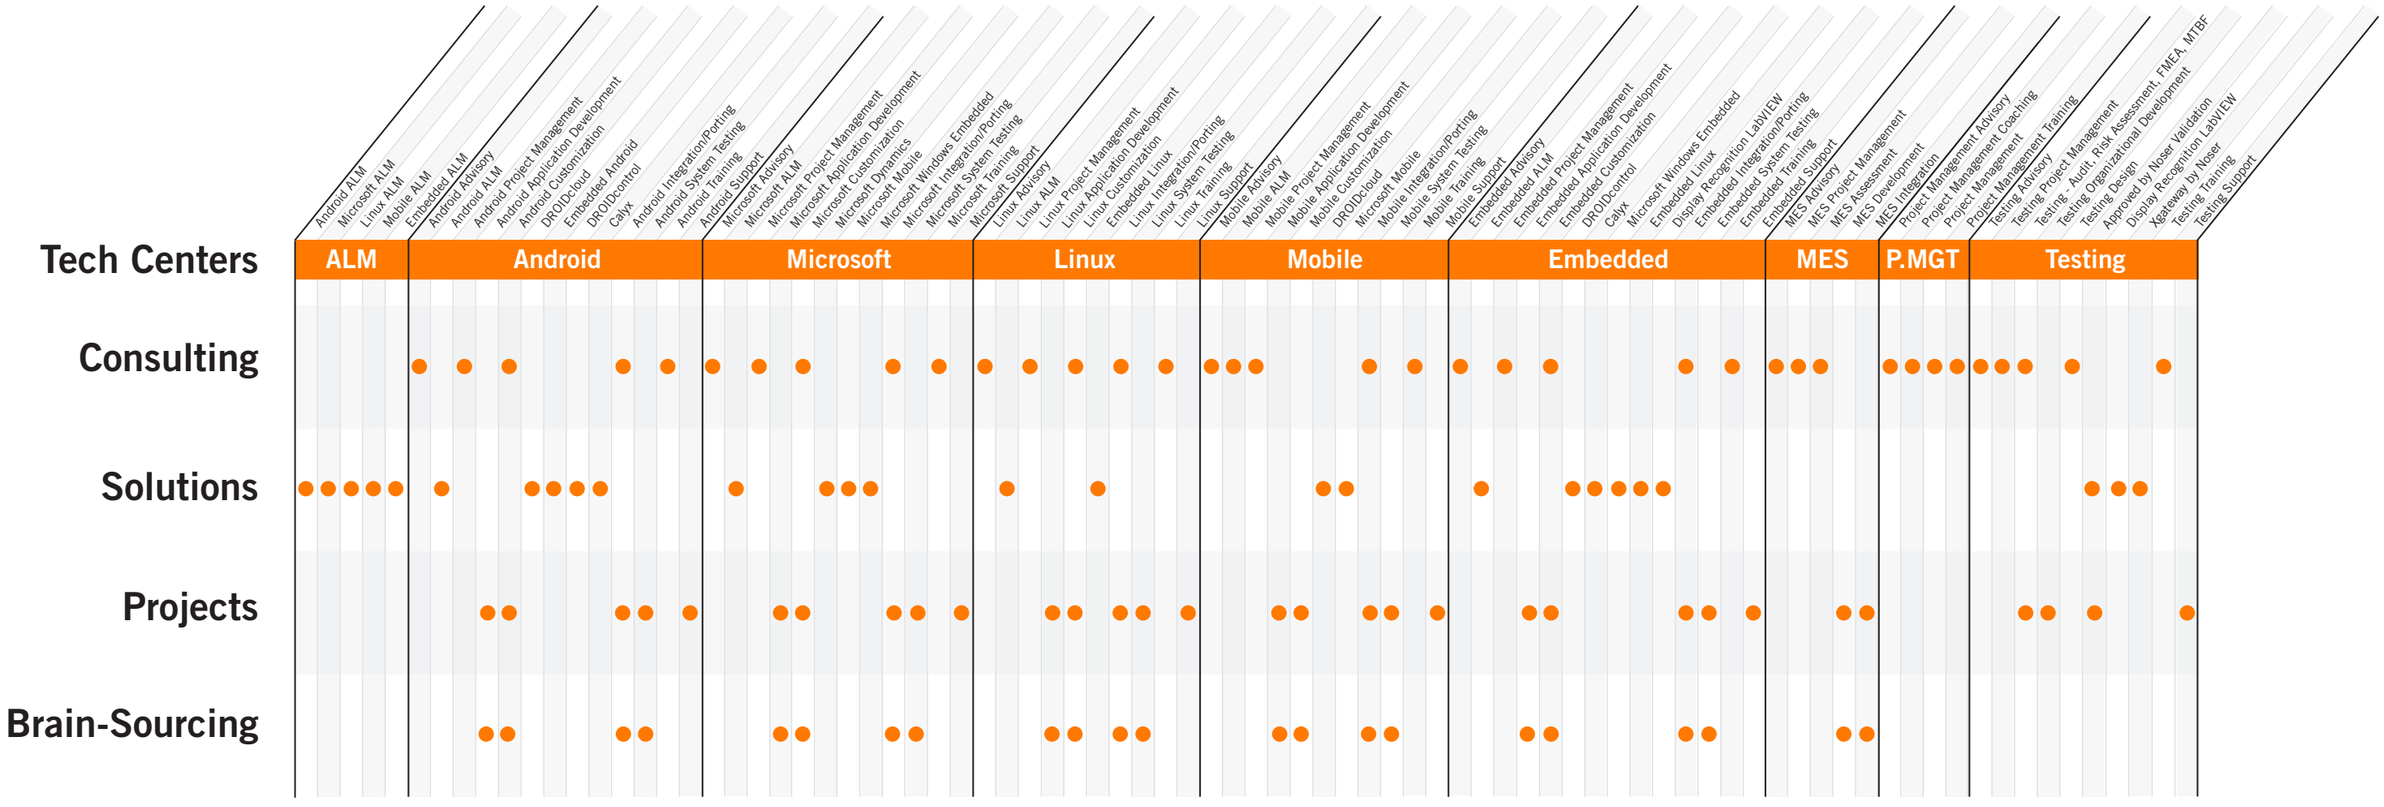
NOSER ENGINEERING
WE KNOW HOW

Structured to meet the market and your IT needs


Our expertise across the information technology sector is focused around four major areas of activity: Consulting, Solutions, Projects and Brain-Sourcing which then intersects with an in depth industry knowledge across nine Tech Centers. Across the entire information technology value chain from Advisory to ALM through to embedding, testing, training and support within all the major leading operating platforms, Noser Engineering Tech Centers are well positioned to support the most complex IT challenge.
